

Easy & Safe travel at minimum cost

The MORRIS MINOR offers every advantage to the man who does not wish to run a large car. It exemplifies safe and easy travel at a cost which brings the joys of motoring within reach of almost everybody.

Study the graceful line of the Minor—its finish, its roominess. See how skilfully it has been designed, how sweetly it runs, the ease with which it is controlled.

When one considers the petrol consumption and the speed obtainable, the conclusion is that the Minor gives the enjoyment of a car with double the horse-power, at half the cost of running.
